

The solution for your agricultural waste

Shorts Group is a leader in waste management. With a large transfer station in Ascot, an expansive skip hire service and more than 50 years of business experience, Shorts Group knows about handling and recycling discarded materials.

Shorts Group is now making that expertise available to farmers. Shorts is pleased to introduce a new recycling service to help farmers comply with the latest government regulations regarding the disposal of farm waste. We know the rules and we know how to ensure that spent materials are managed according to the highest standards.

As a leading agricultural contractor, Shorts is uniquely positioned to deliver a waste management solution to farmers that is certain to meet their needs in a timely and cost-effective manner.

Why not call us today to see how Shorts Group can help you?

New government regulations have changed the way in which farms can dispose of recyclable waste. A leader in waste management, Shorts Group is pleased to provide a bespoke recycling service, geared specifically to need the changing needs of farmers.

To see how we can help with your farm recycling and waste management needs, please contact Shorts Group today on:

Agricultural Waste Recycling and Rubbish Removal

What and how do we collect and recycle farm waste?

FERTILISER AND SEED BAGS

- Empty fertiliser and seed bags can be rolled up and bundled into one of the empty bags
- There is no need to separate the inner bags from the outer shell
- Small amounts of unused fertiliser are acceptable; such bags are considered empty

PESTICIDE CANS

- Pesticide cans must be triple-rinsed and put into a large 3000-litre bag, which Shorts can provide
- The empty cans are loaded into large bags, provided by Shorts; each bag holds 120 cans on average (which equates to approximately 70 acres of annual spraying)
- Foils and caps from pesticide cans can be collected in a small bag which we provide; these bags need to be sealed and placed into the large bag with the pesticide cans when full
- Paper labels can be left on the pesticide cans

- For large arable units, we can supply a large bag which holds approximately 1300 cans – this must be stored under cover and is returnable for reuse.

CROP COVER

- Crop cover can be rolled up for collection by Shorts Group; we then bale the materials for recycling

CARDBOARD

- Cardboard boxes can be packed flat and placed into an empty fertiliser bag

SILAGE WRAP

- Silage wrap can be rolled up and put into a bag that Shorts Group can provide
- Our 200-litre bag holds between 10 to 14 clean wraps; our 1400-litre bag holds between 125 to 175 clean wraps
- Dirty and wet wraps are acceptable but, as to be expected, will reduce the quantity in each bag

SEED TRAYS

- Seed trays can be gathered in an empty fertiliser bag, for collection by Shorts

PLASTIC-PACK HOUSE WASTE

- This is combined and collected on an *ad hoc* basis

NET AND STRING

- Net and string can be combined in our 200-litre bag

What else can we collect?

Shorts Group offers a variety of disposal solutions to farmers and businesses alike. Whether you require regular rubbish collection or if you only need an occasional pick-up, we can provide the right service to meet your needs.

We have skips in all sizes, from 3-yards to 40-yard roll on/roll off skips. We also run a grab lorry service, ideal for removing large loads of muck or rubbish.

MORE ABOUT SHORTS GROUP

We can provide specific skips for general waste, timber, tyres, asbestos and inerts. For more information about our expansive skip hire service, please contact us directly.

We recycle 85% of construction and demolition waste and we will recycle 90% of agricultural waste.

Shorts Group also provides a range of recycled materials suitable for farm usage, like crushed concrete and crushed brick.

Please visit us online at www.shorts-group.co.uk.

Printed on recycled paper.

Don't forget to ask about our shotgun cartridge recycling service!
