

# SHORTS

## Lime and Fertiliser Spreading with comprehensive soil testing

At Shorts Group, we provide a complete lime supply and spreading service to farming customers across the Home Counties.

We're pleased to offer your choice of liming materials: screened chalk, ground limestone Envirocal or ground magnesium limestone.

Shorts Group understands the importance of timely applications – and we aim to work around your farming schedule.

With our bespoke service, tailored to meet your needs, we can apply lime and PK fertilisers at a flat or a variable rate, compatible with SOYL application data.

To discuss your soil testing and lime requirements please contact Shorts Group today.

Shorts Group are agents for:

printed on recycled paper

In today's climate of changing farming trends, it is very reassuring to know that Shorts Group can help you and your farm with the following services:

- Grass, whole crop and maize clamp silage
- Grass square bale silage and wrapping
- Straw baling and stacking
- Hay making (complete operation)
- Muck-spreading (360° digger or wheeled loading)
- Maize drilling (with or without fertiliser)
- Min-till drilling
- Ploughing
- All land cultivations
- Lime spreading
- Set-a-side topping
- Pasture maintenance (harrowing, rolling, spraying, fertilisation and grass cutting)
- Hedge cutting
- 360° digger (with operator)

We're open-minded in our thinking and flexible in our approach, so if you have a specific agricultural need not listed here, chances are we can help.

To see how we can help, please contact Shorts Group today:
